

# Aftercare

## Day 1

Every 45 minutes  
for the first 3  
hours

Clean brows  
gently with sterile  
water, cooled  
down boiled  
water

**DO NOT SOAK** the  
treated area

## Day 2-3

Clean brows with  
sterile water 2-3  
times a day

After all flaky skin  
has naturally come  
off, it is  
optional but  
recommended  
to apply some  
vitamin E oil

Apart from when cleaning as instructed, keep brows dry, avoid any creams, make up and facewashes. Golden rule do not apply anything for the first 2 weeks. You can shower as normal, avoid the eyebrow area and if it does get wet pat dry with a CLEAN towel
